

Letter of Recommendation for Averie Ngoc Phan

August 18, 2026

To Whom It May Concern,

I'm writing to recommend Averie Ngoc Phan. I've worked with her for the past several years and have consistently been impressed by the quality of her work and the way she approaches problems.

Averie has a strong track record of delivering results that actually matter. The work she's led has expanded the product's reach to non-English-speaking clients, reduced compliance risk through better accessibility, improved performance for our most demanding customers, and made day-to-day admin work noticeably faster and less error-prone. She doesn't just ship features. She makes things better for the people using them.

She's comfortable owning work across the stack and is someone I trust to take a feature from design through to production. She's also reliable under pressure: she raises risks early, handles on-call with strong technical judgment, and steps up when things get ambiguous or when other teams are stretched thin. She communicates well with others and works effectively with different groups throughout the SDLC process.

I've also seen her grow a lot. She's moved past just strong execution and is now helping shape the direction of the work, coming up with better workflow and UX ideas rather than only implementing what's given. She's clearly developing the depth needed for bigger roles.

I'd recommend Averie without hesitation. She's the type of engineer who quietly raises the bar for the team around her. Happy to provide more detail if useful.

Sincerely,

Shawn Khan
