

Greg Hite
Supervisor of Software Development, Paycom Payroll
Oklahoma City, OK — greg@greghite.com — 405-740-7122

May 10, 2026

Dear Hiring Manager,

I had the pleasure of serving as Averie's direct supervisor at Paycom Payroll for 3.5 years. In that time, she proved herself to be an exceptional software engineer and the backbone of our team, consistently handling every type of challenge with skill, ownership, and a solutions-oriented mindset.

Averie sets the standard for exceptional attention to detail. She regularly identifies potential oversights during the Design, Specs, and Breakout phases of projects, preventing issues from ever reaching production. With strong experience across both back-end and front-end development, she delivers high-quality, well-rounded solutions regardless of the technical domain.

What stands out most about Averie is her genuine winning mindset and proactive spirit. When QA resources were stretched thin, she stepped up without hesitation to test not only her own work but her teammates' projects as well. She collaborates effortlessly across groups—building strong working relationships with Product, QA, Development Leads, and AppSec—and gets things done without friction. Averie takes real ownership of challenges, diving in to understand problems and drive solutions rather than waiting for direction. She consistently thinks beyond the immediate fix, keeping the customer experience front and center.

Her contributions have delivered tangible value to our clients and platform. Just within the last year, Averie successfully completed **ten major feature initiatives with 100% production success**. Highlights include:

- Leading internationalization efforts for key modules, enabling non-English speaking clients to use these features effectively and significantly expanding our addressable market.
- Delivering major usability and modernization improvements, along with modern UI updates, that save client administrators considerable time and reduce errors.
- Driving scalability enhancements that improved performance for clients with complex datasets.
- Implementing global changes across the reporting platform while maintaining full backward compatibility for existing automations.
- Owning extensive quality assurance efforts, including 400+ automated tests and proactive cross-team testing that prevented client-facing defects.

In addition to her core project work, Averie maintained a substantial operational commitment—handling research investigations, maintenance, security compliance, and other critical tasks—while providing after-hours on-call support and investing extra hours to meet accelerated timelines without compromising quality.

Averie demonstrates a deep commitment to continuous growth and actively applies new technical expertise to deliver superior outcomes, strengthening both team performance and measurable business impact. She elevates everyone around her through her customer-focused, collaborative, adaptable, and relentlessly reliable approach. I have no doubt she will be an exceptional asset to any team fortunate enough to have her. I recommend her without reservation.

Sincerely,
Greg Hite
